

Hack4Change

24th March 2023

From 20th March to 24th March 2023, IEEE IGDТУW organized our flagship hackathon Hack4Change as a part of WIEmpower 4.0. The hackathon was conducted in a hybrid mode wherein the first two rounds were carried out in online mode which required participating teams to submit their ideas and prototypes on the Unstop platform.

We had over 250 registrations for the hackathon. Shortlisting was carried out after the second round and the top 10 teams had to present their ideas and prototypes in front of a panel of esteemed judges on 24th March 2023.

The panel consisted of two highly esteemed judges, Mr. Sahil Rahman who is an SDE and Data Science instructor. He has served as a judge, mentor, and speaker at over 60+ hackathons and various tech events. He has also worked with Porsche(Japan) on the OpenAIGPT3 model.

Our second judge was Mr. Jai Sadana who is a creator and community manager at Social. He has served at Microsoft for 2 years as an MIE Trainer. He has also received numerous awards such as Young Entrepreneur 2020 and IESA Outstanding NGO of the year.

The teams had to present their ideas in under 5mins after which the judges asked questions in the Q&A session. The ideas were refreshing and the teams presented their ideas with the utmost confidence.

The closing ceremony for Momentum 3.0 was also held after the presentations. Mentors were felicitated for their hard work throughout the month and the best-performing mentees for each track(DSA, Web Development, App Development, Chatbots) were awarded certificates.

After the judges' discussion, the final winners for Hack4Change were also announced and awarded certificates. The top 10 teams were also rewarded for their hard work and perseverance.
