

How to Overcome the Fear of Internships/Placements

24th March 2023

During the Wiempower 4.0 week, IEEE IGDTUW hosted a captivating session on "How to overcome the fear of Internships/Placements". The event was graced by Mr. Utkarsh Gupta. He is a Grandmaster on Codeforces, a 7-star coder on Codechef, and a CP educator in Codechef. He is currently working as an SDE at Graviton Research Capital. He secured AIR 1 in Google Kickstart. The session saw immense participation from over 150 students.

One of the key takeaways from the session was the importance of preparation. From researching the company or organization you're applying, to practicing your interview skills, being well-prepared can help you feel more confident and in control.

Another important point was the value of networking. He gave amazing insights into his process of networking. Whether it's reaching out to alumni from your school, attending industry events, or connecting with professionals on LinkedIn, building a network can help you gain valuable insights and make important connections.

He ended the session by sharing his own experience of securing AIR 1 Google Kickstart and entertaining the doubts and queries of the students. The session turned out to be very informative and effective for the students.
